Searching the news with *Nexis Uni*

Ferbuary 2025

UNIVERSITY OF AMSTERDAM

Before you start

- Set up a Nexis Uni account (1 slide)
- Adjust your personal settings (3 slides)

How to select sources

- Select sources by title and then search (4 slides)
- Select more sources from one Country (4 slides)
- Search first and then select the sources/refine the results (3 slides)

How to use search operators

- Why use search operators (1 slide)
- Using AND/OR, word variations, phrase, proximity, frequency (4 slides)
- Search specific sections of the articles: headline, title, author (3 slides)
- Search examples with search operators and specific sections (1 slide)

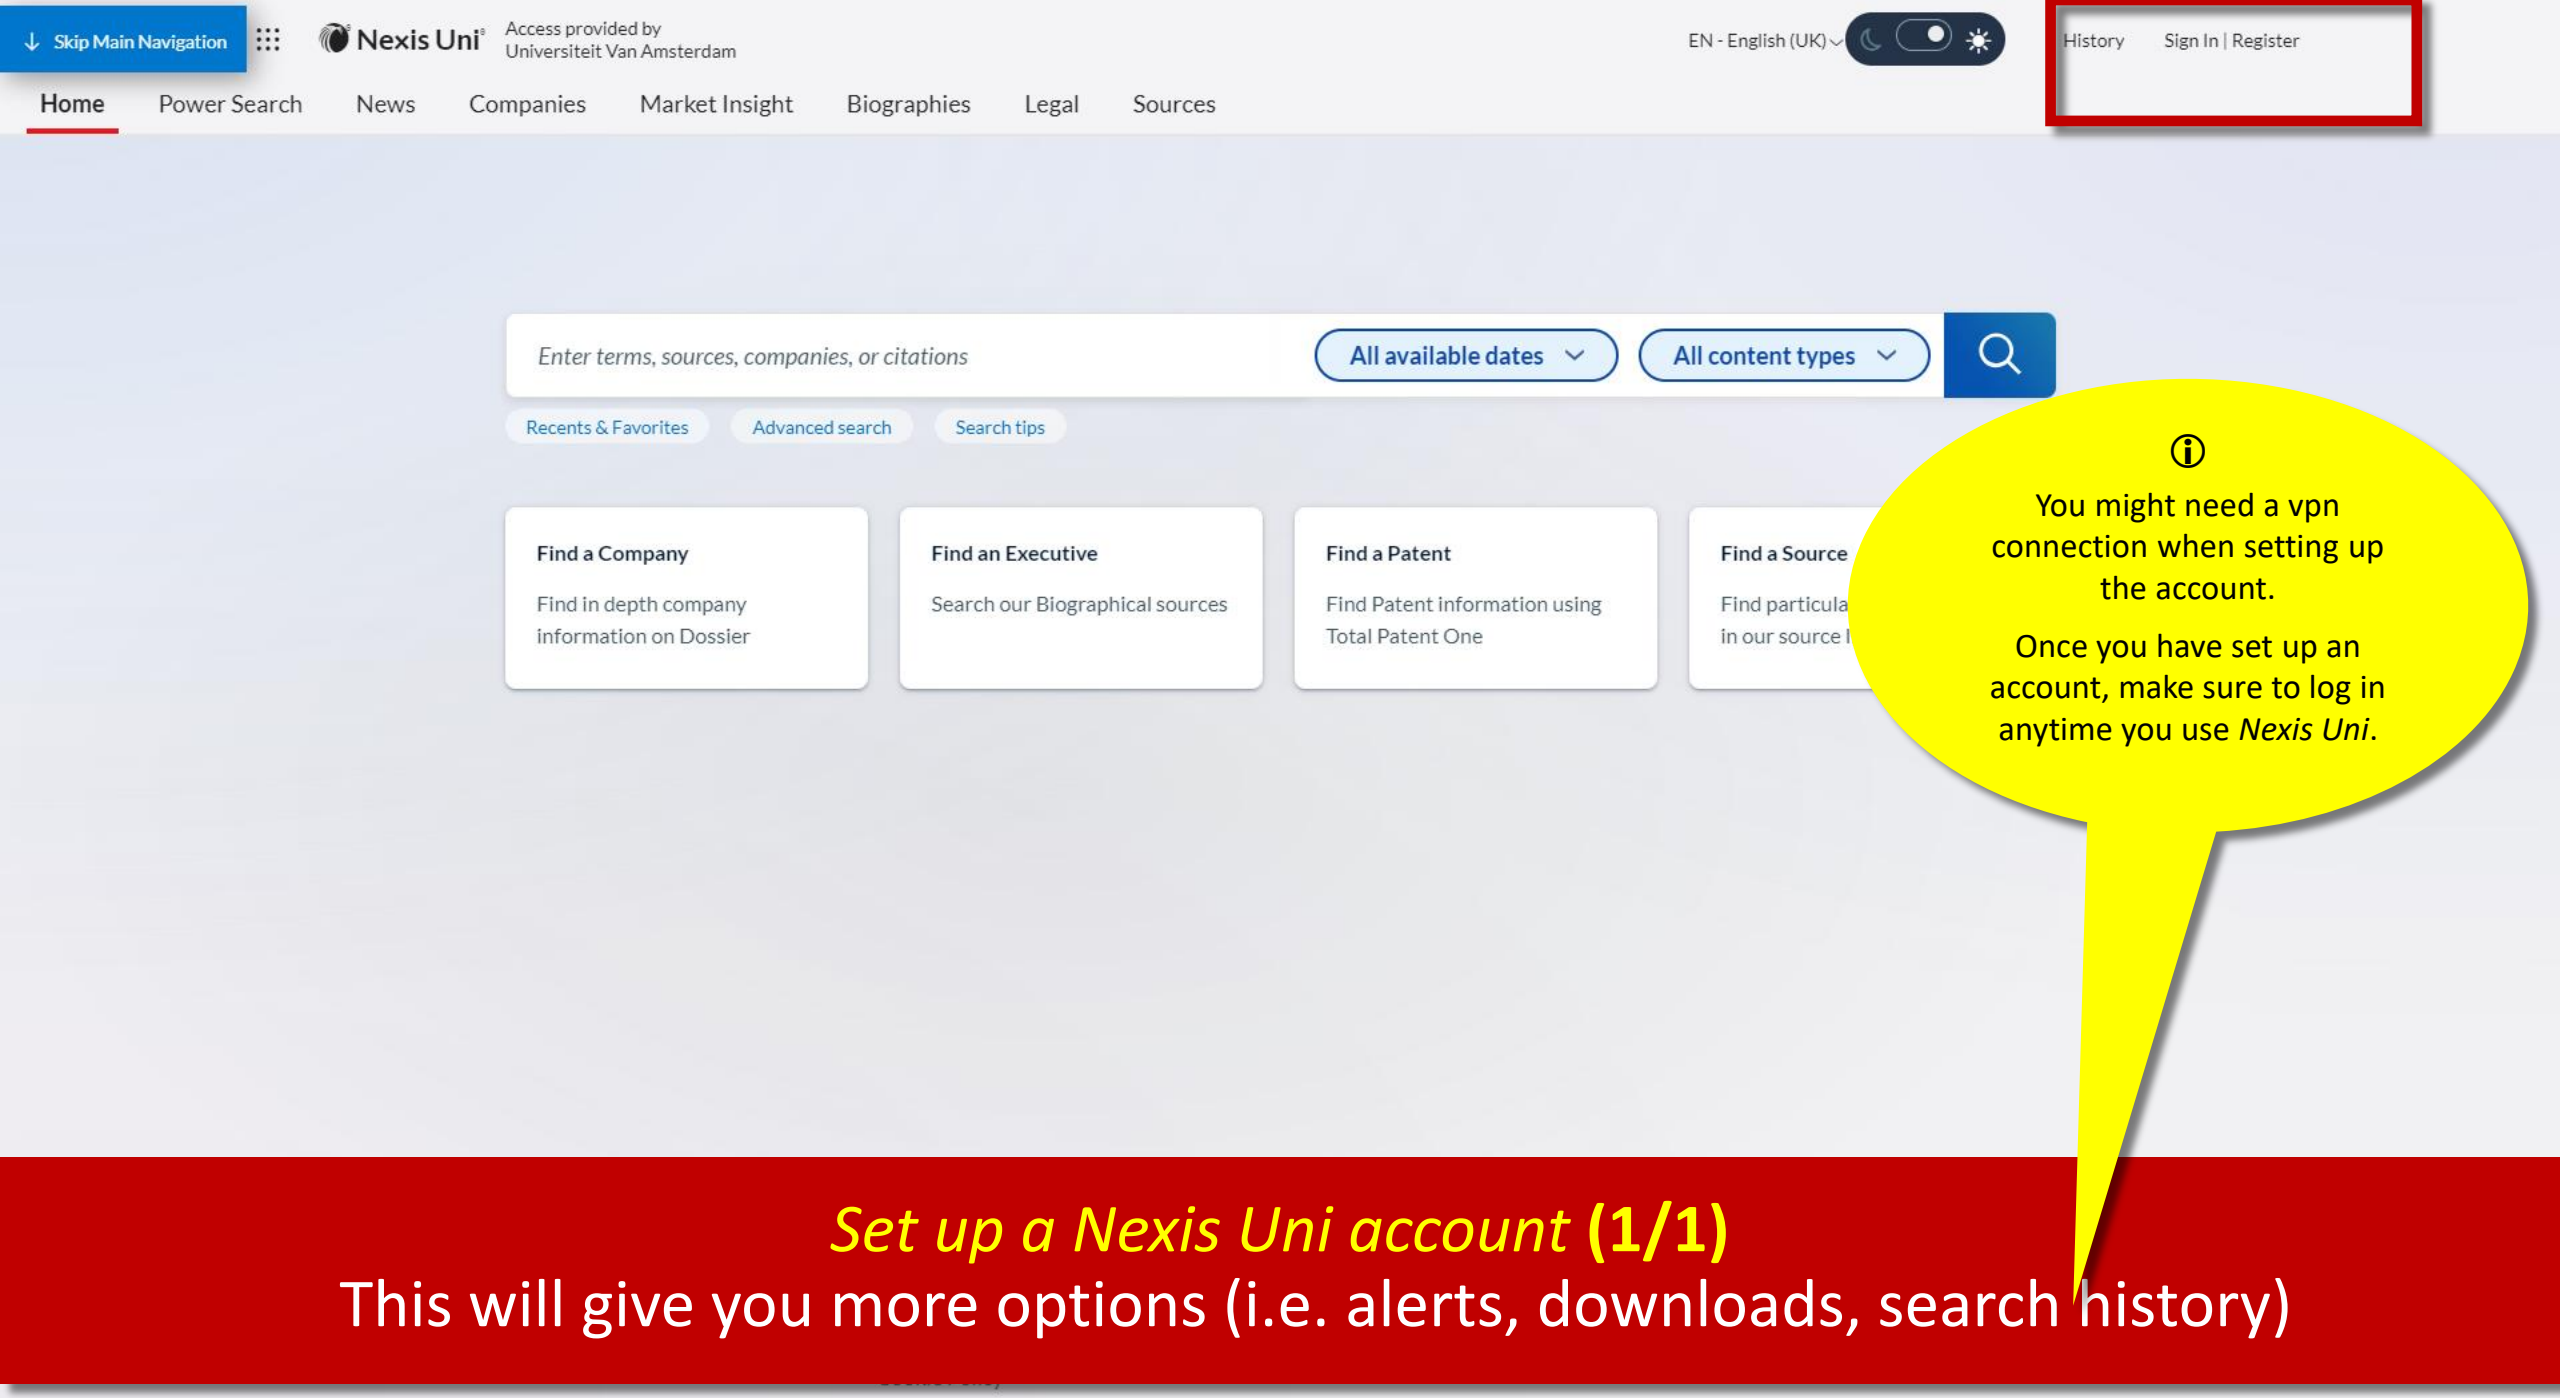

How to deduplicate and download, save, or export results

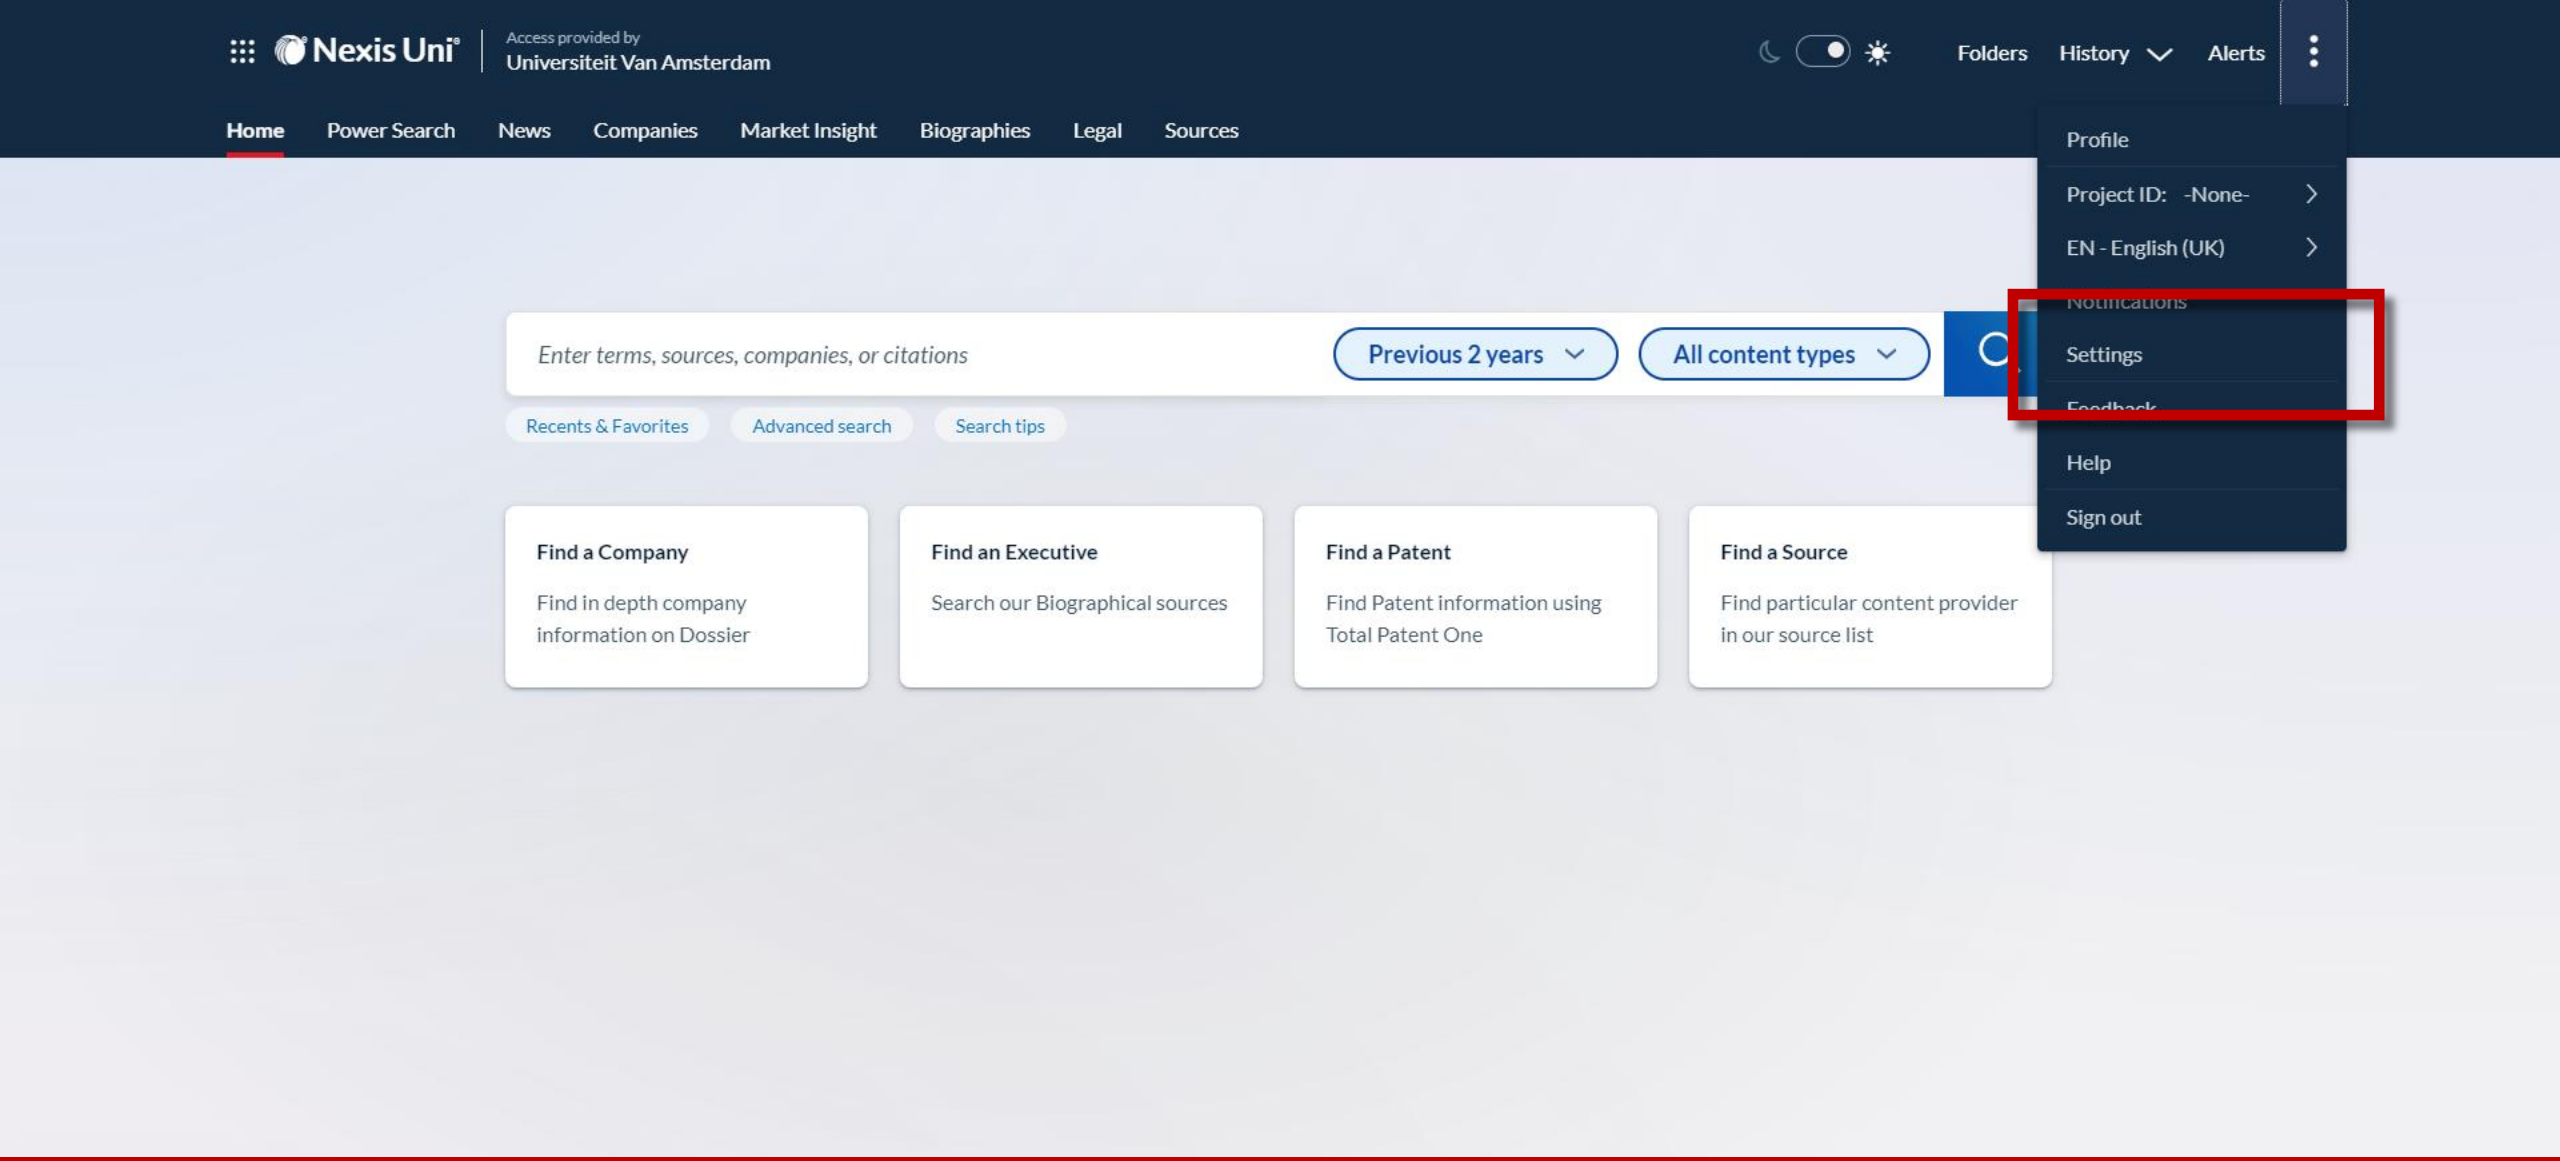

- Deduplicate results (1 slide)
- Download/save up to 500 (full-text) articles simultaneously (2 slides)
- Export to citation tools such as *Zotero* (2 slides)

Contact (1 slide)

The yellow text balloons throughout the powerpoint draw special attention to possible stumbling blocks while searching *Nexis Uni.*

Why use search operators

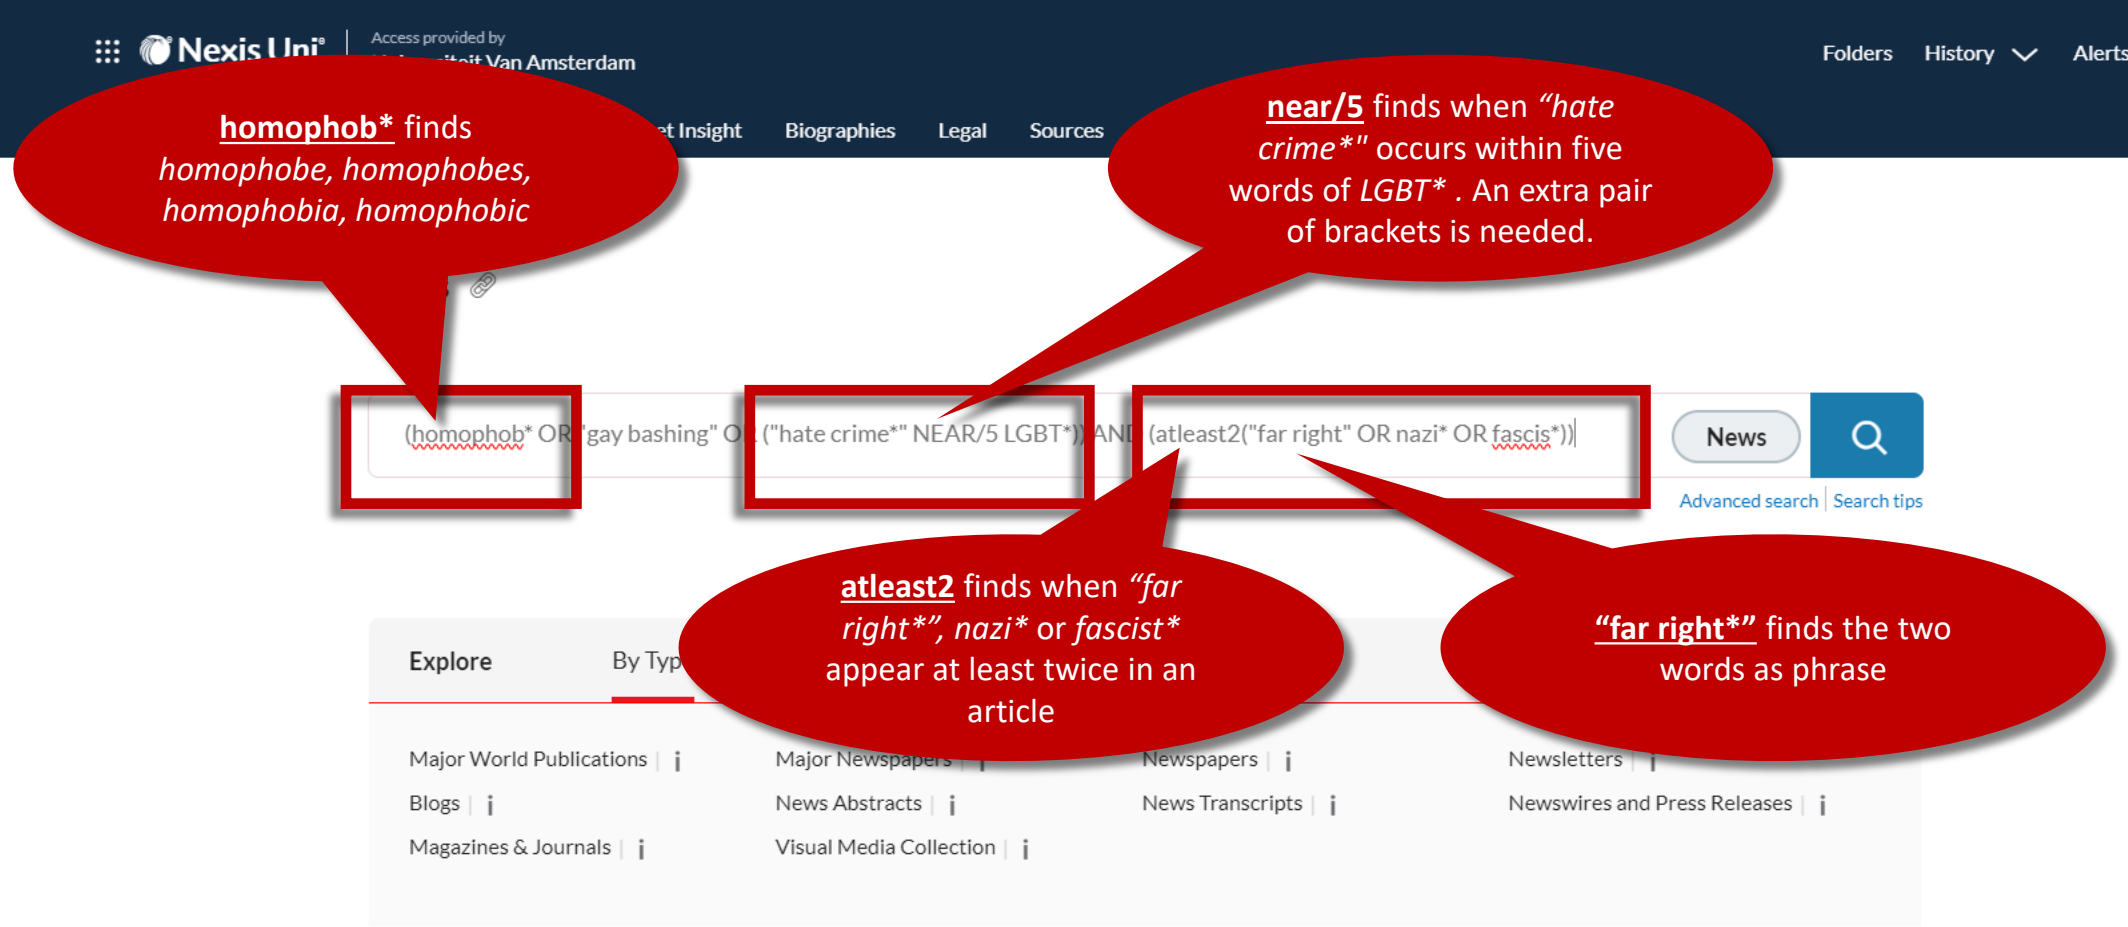

Just as with any other online information resource, search operators allow you to better translate your research question into a search string (a combination of search terms) suited to find the information you need.

The search operators available at *Nexis Uni* include:

- combining the search terms using **AND** (*colonialism AND neoliberalism*), **OR** (*LGBT OR homosexuals*);
- searching for **word variations** (*decolonial*, *decoloniality, decolonialization, decolonized*);
- **phrase searching** (*"Black Lives Matter"*, *"cultural capital"*);
- **proximity search** (two words occur within a certain number of words from each other: *Neoliberalism and its colonial roots*);
- **frequency search** (a word appears at least so many times in a document: *LGBT-rights have been a major concern of the LGBT-community*).

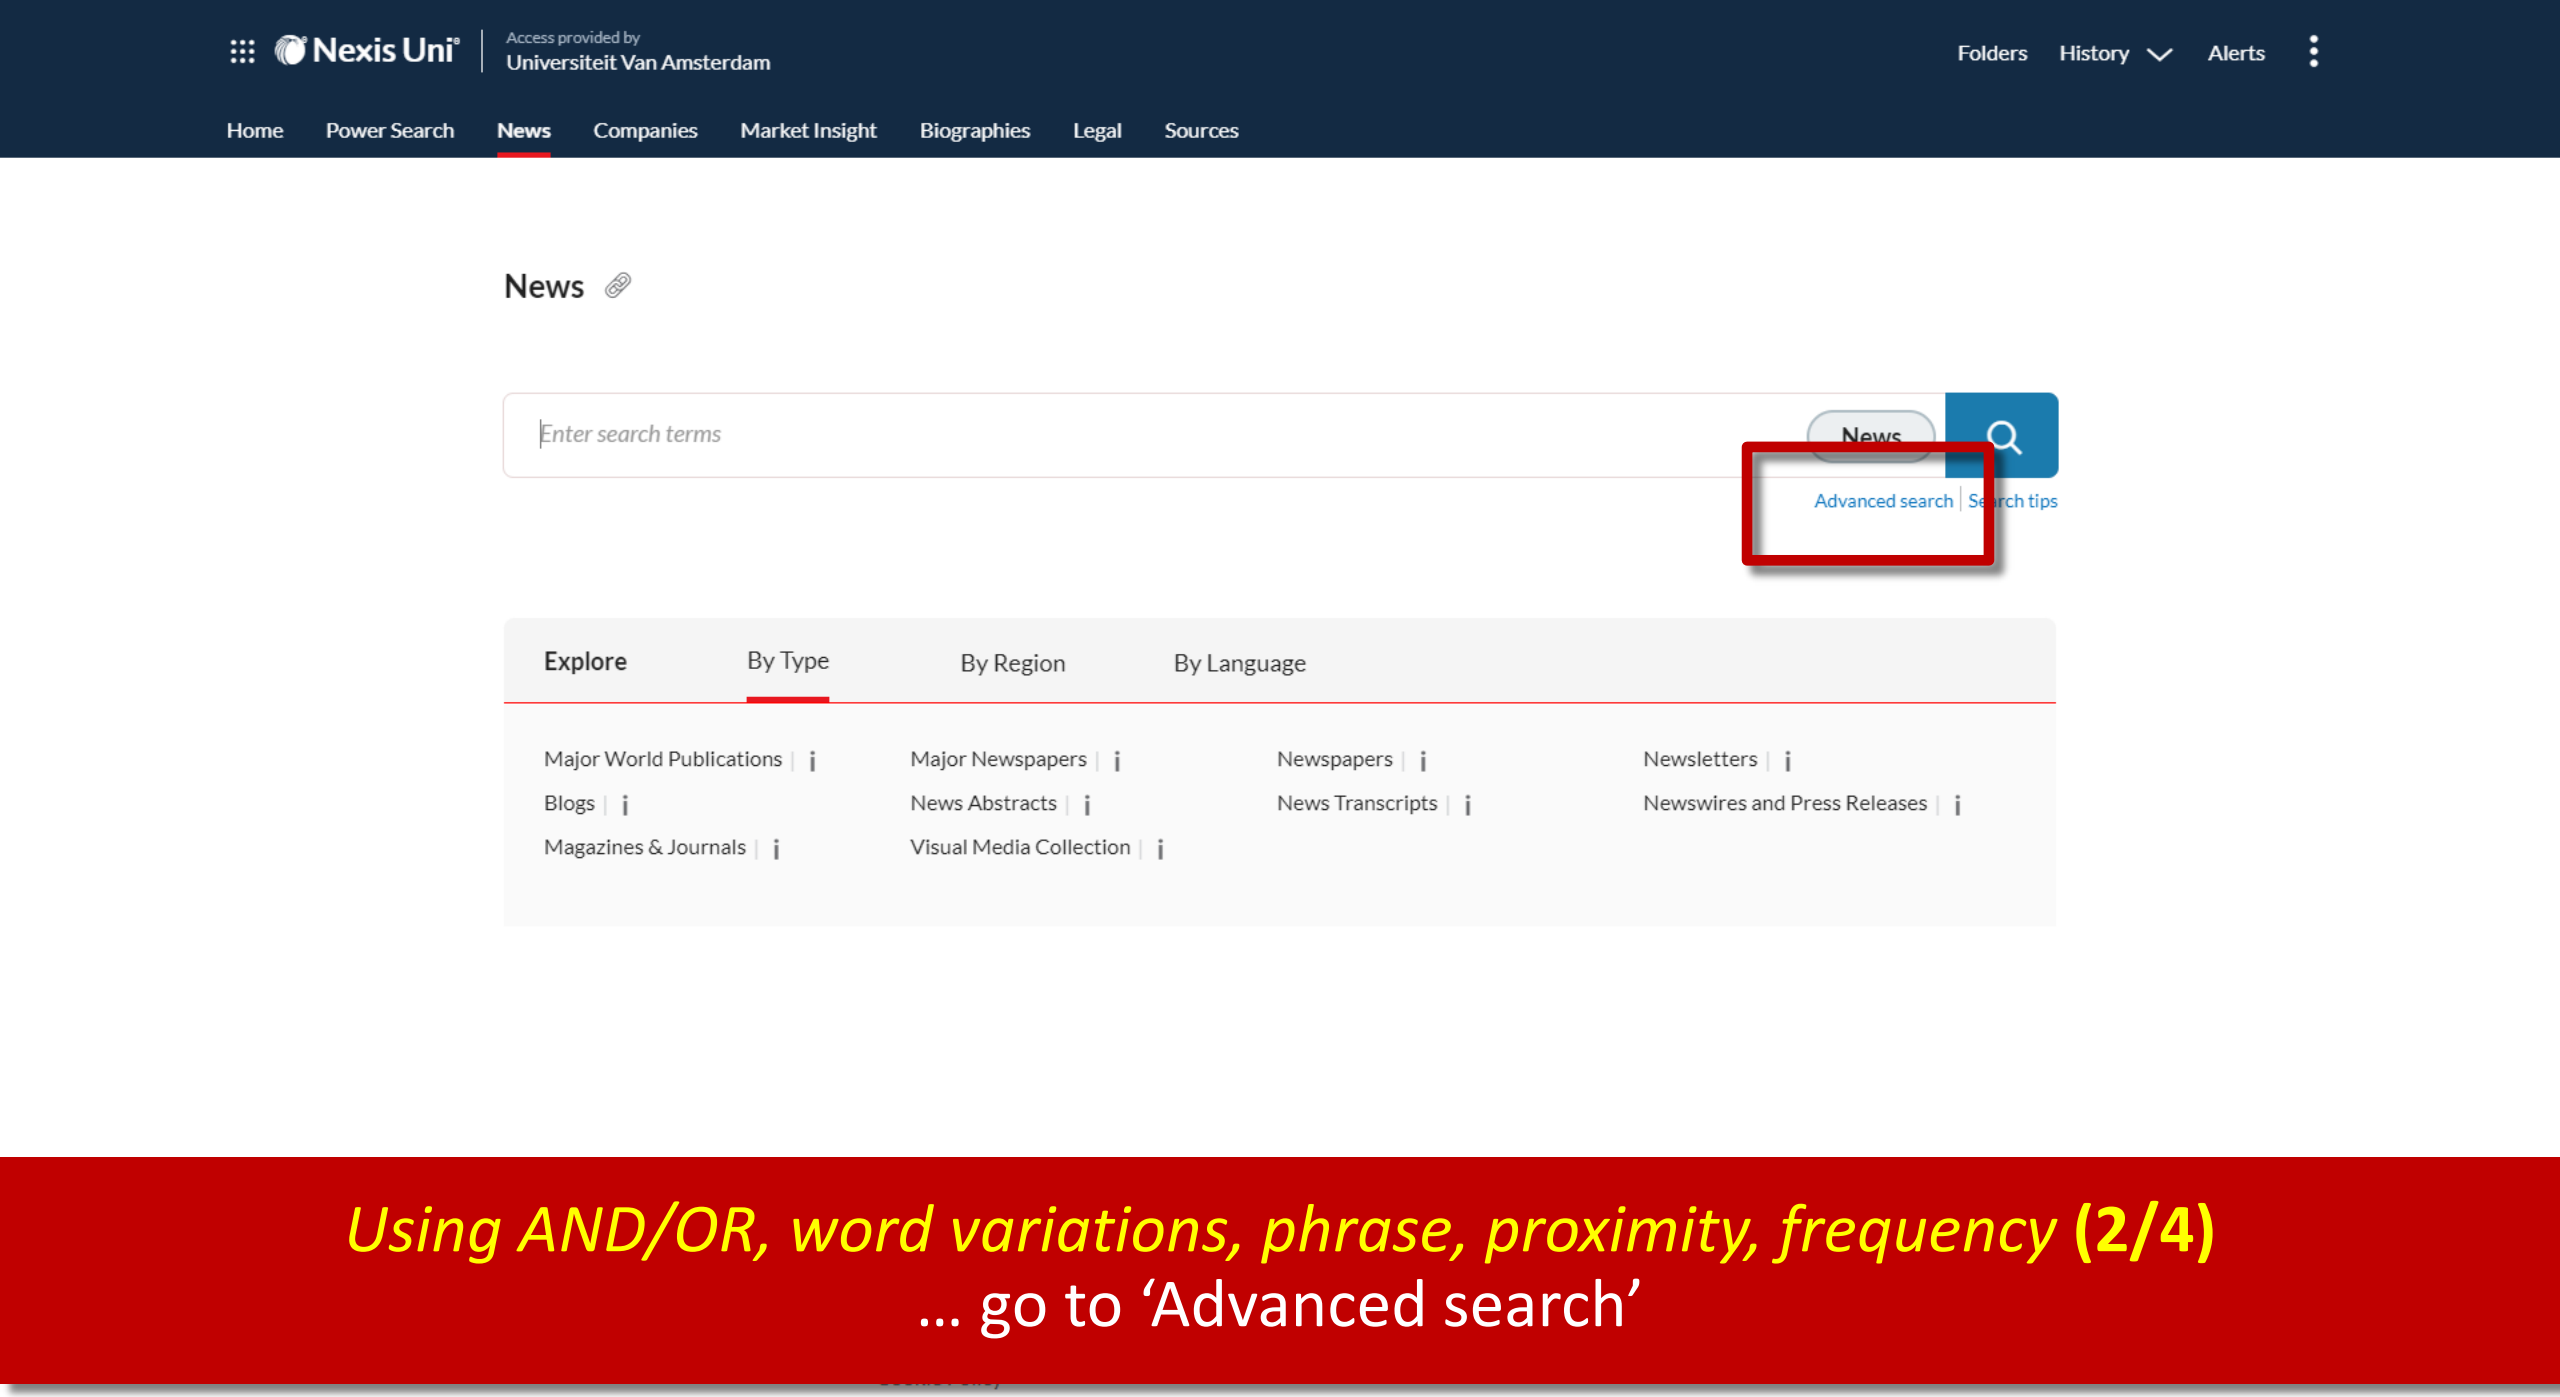

Newspapers articles can further be searched with *Nexis Uni* also in their different sections, such as **headline**, **title**, **author**.

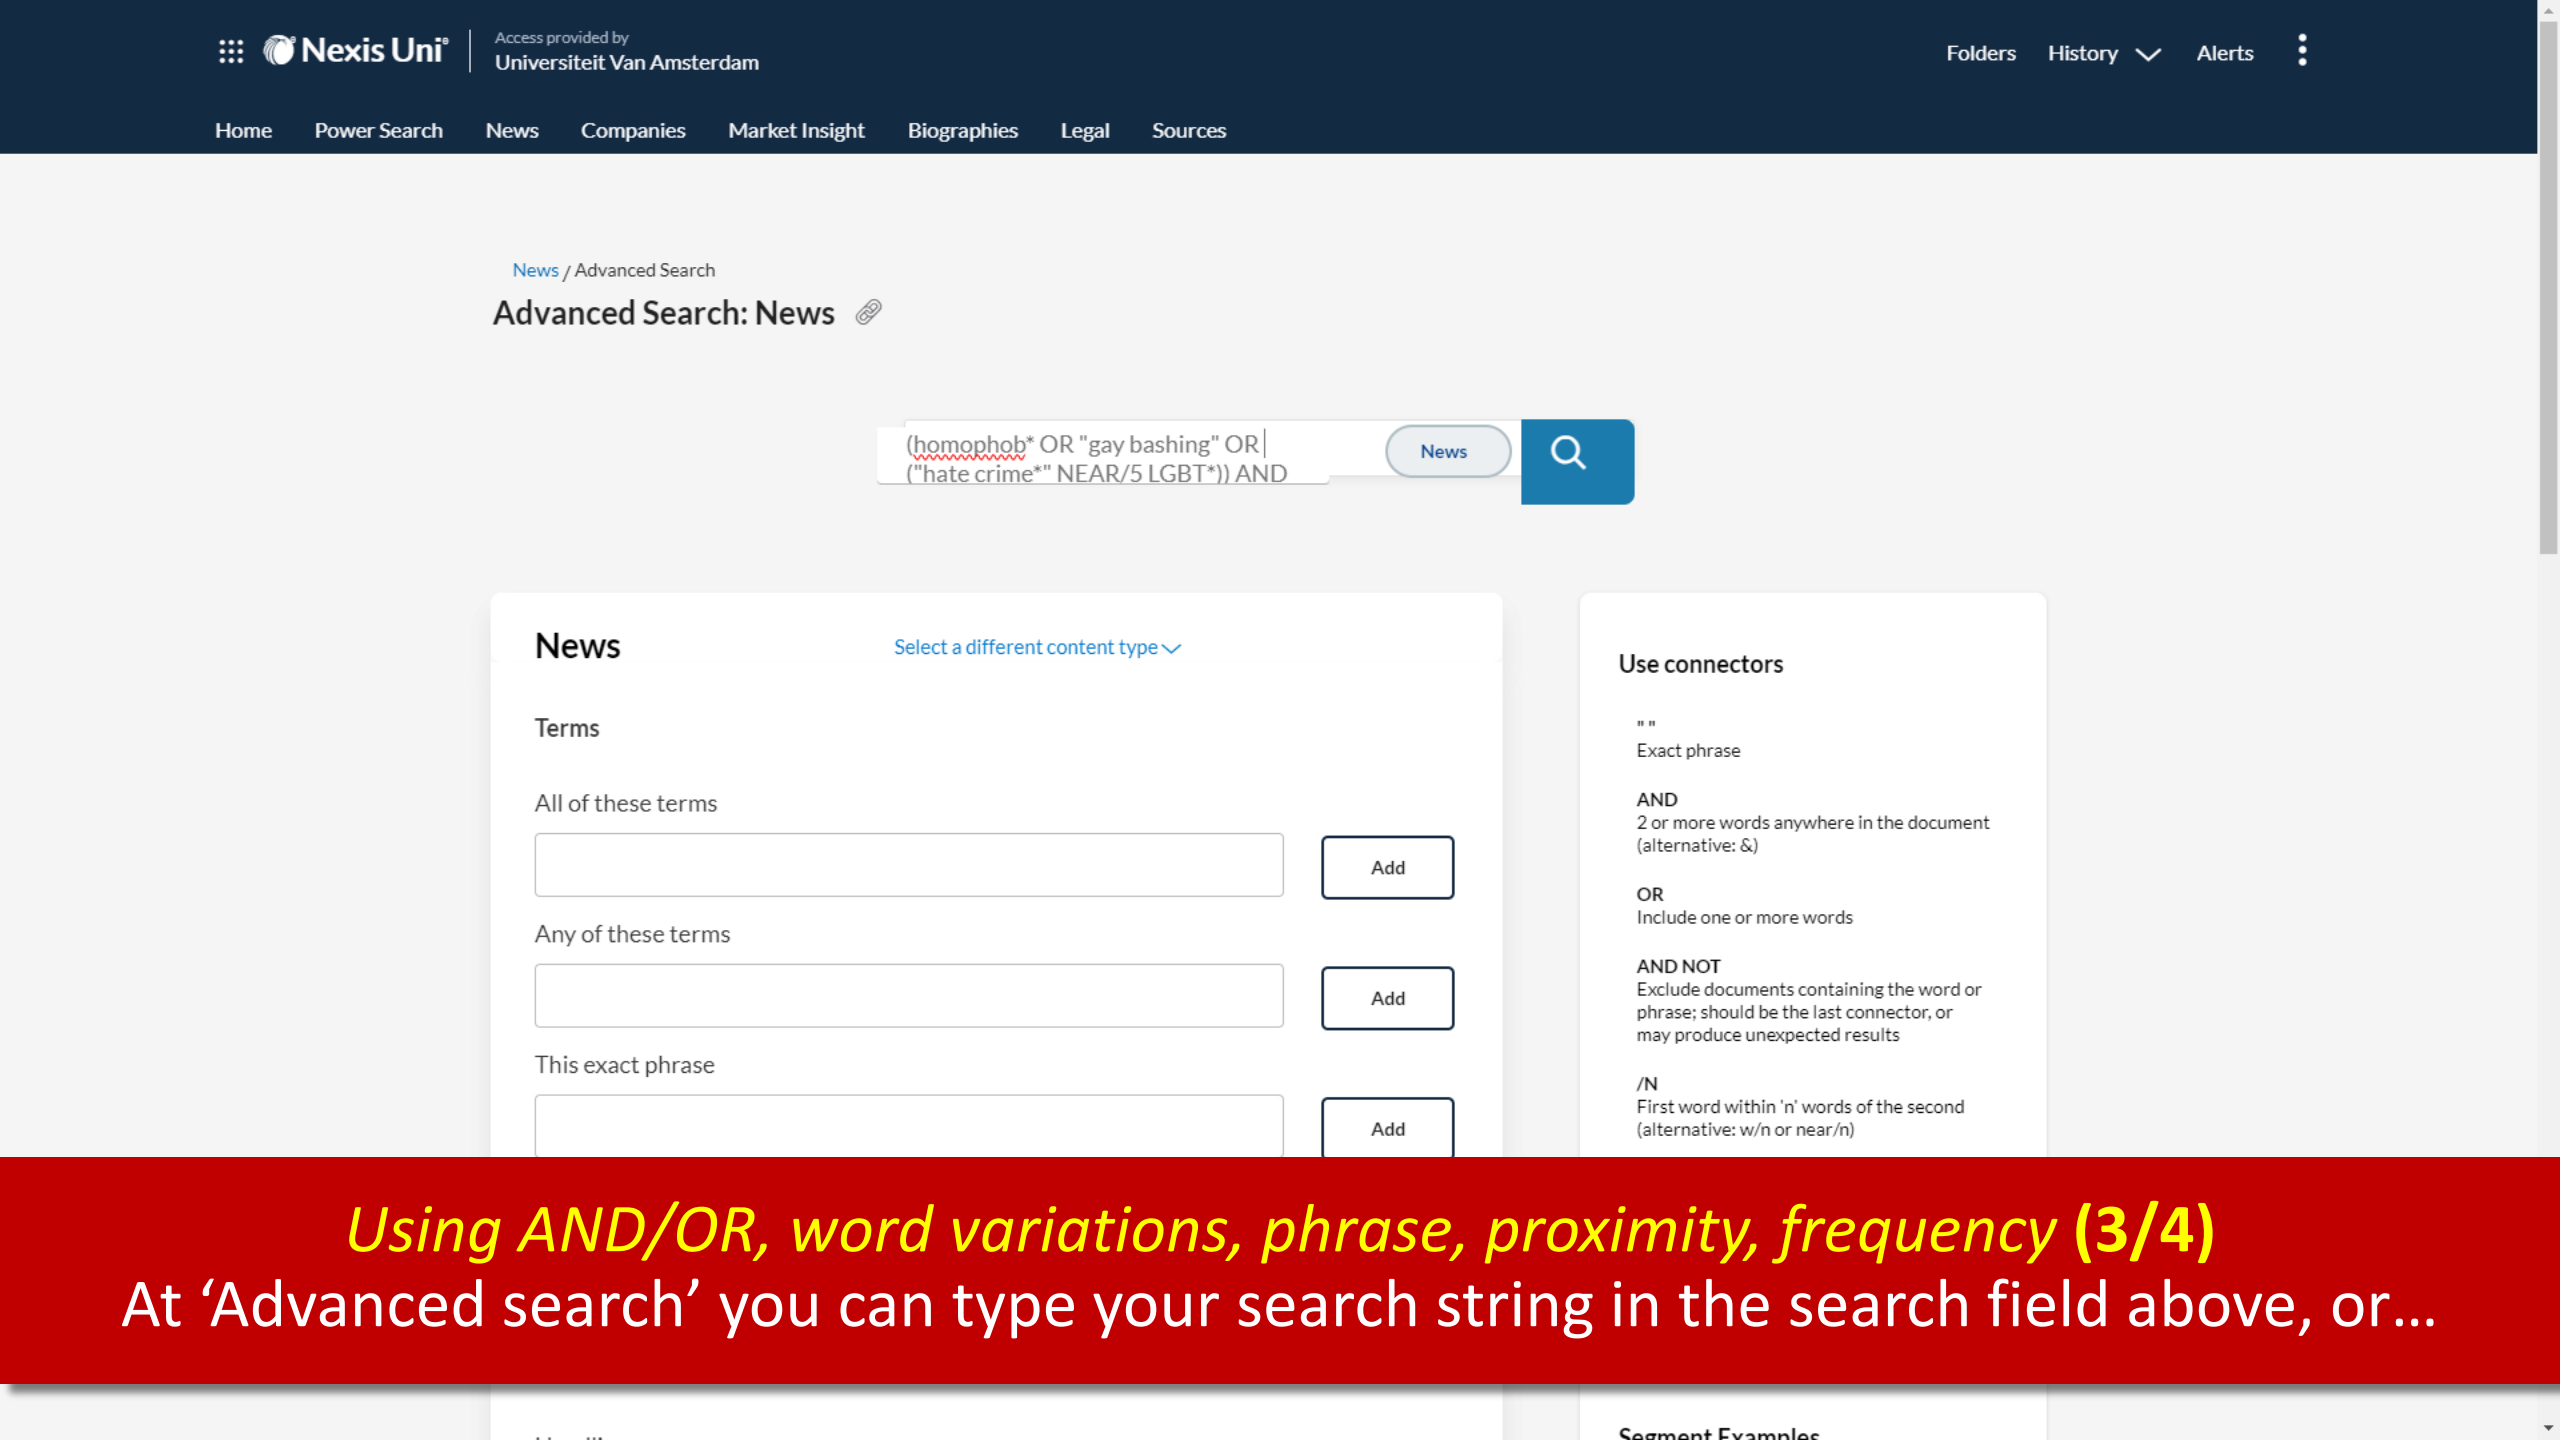

Using AND/OR, word variations, phrase, proximity, frequency **(1/4)**

Type your search string as in the above example, or…

Using AND/OR, word variations, phrase, proximity, frequency **(2/4)**

DON'T say his name.

Don't share the livestreamed video of the killings, don't read that rambling adolescent nonsense of a manifesto, don't fill newspaper front pages with stories about his childhood. Ever since news broke of the terror attack on two Christchurch mosques, there have been calls to deny the suspect attention in favour of focusing on victims and survivors - and now New Zealand's prime minister Jacinda Ardern has put her moral authority behind them.

She will not, she said in parliament, publicly use his name : "He is a terrorist. He is a criminal. He is an extremist. But he will, when I speak, be nameless."

Obviously, there is a limit to what such a decision can realistically achieve. Everything about the manifesto, with its jarring in-jokes and

Body

Go 19.9 billion to a subsidiary in Bermuda in 2017 as part of its contentious "Dutch sandwich" tax avoidance

the Caribbean haven through a Dutch subsidiary increased by about (EURO)4 billion that year, according ds. The method helped Google to pay a corporation tax rate of a little more than 6 per cent on its foreign ea 35 per cent headline rate in effect in the US at the time.

The revelation, which was first reported by Reuters, shed light on the legal methods Google's parent company Alphabet and other multinationals use to lower their tax bills. Widespread avoidance by Silicon Valley companies has led to an international effort to close loopholes, with some countries adopting individual measures. Britain plans to introduce a tax on large internet companies next year.

Google uses a tax avoidance technique called the "double Irish, Dutch sandwich". This involves moving profits between two companies
