Why use search operators

Just as with any other online information resource, search operators allow you to better translate your research question into a search string (a combination of search terms) suited to find the information you need.

The search operators available at *Nexis Uni* include:

- combining the search terms using **AND** (*colonialism AND neoliberalism*), **OR** (*LGBT OR homosexuals*);
- searching for **word variations** (*decolonial, decoloniality, decolonialization, decolonized*);
- **phrase searching** (*“Black Lives Matter”, “cultural capital”*);
- **proximity search** (two words occur within a certain number of words from each other: *Neoliberalism and its colonial roots*);
- **frequency search** (a word appears at least so many times in a document: *LGBT-rights have been a major concern of the LGBT-community*).

Newspapers articles can further be searched with *Nexis Uni* also in their different sections, such as **headline, title, author**.

homophob* finds
*homophobe, homophobes,
homophobia, homophobic*

near/5 finds when "*hate
crime**" occurs within five
words of *LGBT**. An extra pair
of brackets is needed.

`(homophob* OR "gay bashing" OR ("hate crime*" NEAR/5 LGBT*)) AND (atleast2("far right" OR nazi* OR fascist*))`

News

Advanced search | Search tips

atleast2 finds when "*far
right**", *nazi** or *fascist**
appear at least twice in an
article

"far right*" finds the two
words as phrase

Body

Google moved nearly €19.9 billion to a subsidiary in Bermuda in 2017 as part of its contentious "Dutch sandwich" tax avoidance

...the Caribbean haven through a Dutch subsidiary increased by about (EURO)4 billion that year, according to Reuters. The method helped Google to pay a corporation tax rate of a little more than 6 per cent on its foreign earnings, compared with a 35 per cent headline rate in effect in the US at the time.

The revelation, which was first reported by Reuters, shed light on the legal methods Google's parent company Alphabet and other multinationals use to lower their tax bills. Widespread avoidance by Silicon Valley companies has led to an international effort to close loopholes, with some countries adopting individual measures. Britain plans to introduce a tax on large internet companies next year.

Google's use of the "double Irish, Dutch sandwich" tax ruse does not sit well with even some of its staff
